

Sundance II Pollen Trap

View From Above:

Pull out
drawer to
get pollen.

**HOW IT
WORKS!**

Bees exit easily
out the cones, not
through the screen.

Interior Exploded View:

- A. Telescoping Cover
- B. Two Layers of 5 Mesh
Bees drop about 70% of their pollen going through the two layers of mesh.
- C. 7 Mesh
Barrier screen that keeps the bees from retrieving the pollen in the drawer.
- D. Pollen Drawer
- E. 7 Mesh Base
Keeps bees out of pollen drawer.
- F. Brood Chamber or Honey Super
- G. Path of bees through pollen trap to brood chamber or honey super.
